

Contracting Services

Frameworks

We have a wealth of experience in delivering major roll out programmes, and have been actively providing collaborative services to many of our principal customers through systems developed and refined in over a decade of Partnering. A formal Framework Agreement with multiple tiers of contractors and suppliers creates the ideal forum for sharing best practice across all aspects of planning, procurement and delivery.

Team relationships develop in the spirit of partnership and through collaborative working and continuous improvement duplication of activities is reduced, processes simplified, delivery enhanced and Customer value maximised.
